**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Freezing level around the highest summits at times. Winds gusting 50 to 55 mph over summits and exposed ridges.

Forecast for Sunday 28 Jan 2024

Weather: Low cloud could become extensive overnight and early morning with some patchy drizzle. Turning drier and brighter by midday with much of the cloud lifting and clearing. Still windy with widespread gales for summits and exposed ridges, leading to a significant wind chill. Lowering cloud and patchy drizzle may return late evening.

Maximum wind: South or Southwest 35 to 40mph gusting 60mph with buffeting.

Chance of cloud-free hill tops above 800m: Possibly decreasing 30% overnight then rising to 80% by late morning. Perhaps decreasing 30% again late evening.

Low Cloud and visibility: Extensive cloud may arrive overnight, base 300 to 600m, lifting and breaking by late morning. Visibility moderate to very poor becoming mostly good or very good by late morning, lowering again late in the evening.

Temperature: **Valleys:** Plus 4 rising to 12 Celsius in the afternoon
At 800m: Plus 2 to 6 Celsius
Freezing level: Above the summits.
